# Smart Start

School-based  
Pre-kindergarten  
Program

“Maximize your child’s  
potential at school”

## All children deserve the best start possible!

Parents are the first and most important people in the lives of their children. All infants are born with the potential to learn and grow. However, what happens to that potential is dependent on early childhood experiences. Early childhood is the most vulnerable period of development and by far the most influential.

If the early experiences of children support healthy development, they will be more likely to enter school ready to learn and successfully cope with the challenges of life.

## What is Smart Start?

Smart Start is a school based licensed early childhood development program that...

- Is offered to support children in developing skills and abilities to best prepare them for success at school, while at the same time providing information and support to parents to maximize their child's potential at school.

This program will provide your child with opportunities for positive emotional, physical and intellectual experiences that will promote his or her overall growth

## The Program Offers :

Daily activities of story telling, singing, arts and interactions with other children will allow your child to learn through play.

Certified Early Childhood Educators develop and implement creative programming on an ongoing basis to meet the needs of your child.

Lunch time meals and nutritious snacks during the day enhance the overall experience for your child.

Parent information and strategies to support the child's development and transition to school.
